

DHL EasyShip.

DHL EASYSHIP is the shipment management tool for the most complex shipping needs. It helps you maximise productivity and is easily customised to suit your way of working.

Shipping? It's all taken care of.

When you operate in a dynamic and hectic business environment, things need to happen quickly and smoothly. DHL *EASYSHIP* helps you work more efficiently, giving you more time to do the rest. And its simple, customisable settings can work just the way you do.

The system is powerful enough to handle the needs of multi-national supply chains or any business with a central shipping function, helping you to streamline your shipping processes and maintain regular delivery schedules with less administration and paperwork.

DHL *EASYSHIP* provides the link between the end of your production line and your customer, helping you to offer maximum value and reliability.

The quick and easy way to handle shipping.

Designed by shipping professionals for shipping professionals.

DHL *EASYSHIP* is a powerful solution for any organisation faced with large shipping volumes or regular scheduled deliveries.

With all the tools you need to automate shipping processes, DHL *EASYSHIP* gives you maximum efficiency, total visibility and control of your shipping.

- **Streamlined shipment preparation and processing:** from air waybills to customs documents, destination coding to shipment manifesting – it's automated
- **Shipment management tools:** with QuickShip to prepare frequently-sent shipments with a single click, automatic email notification of critical shipping information, multi-user access via Local Area Network (LAN), rates calculator per agreed tariffs, automated manifesting for the same time every day, e-mail alerts to recipients on despatch or delivery, customised management reports for current or historical shipments and costs – it's advanced and efficient
- **Advanced shipment tracking:** 24/7, real-time tracking of individual or multiple shipments, inbound or outbound. Search by air waybill, date or shipper's reference - it's always available.
- **Database management and maintenance:** for address details and shipment history for multiple mailing lists (plus data import/export options for synchronising with other databases) – it's comprehensive
- **Full technical support:** training, documentation, helpdesk, updates and on-site maintenance – it's simple and reliable

DHL *EASYSHIP* can run on a single PC or over your local network, so you can extend access to several users. It's a Windows-based system, easy to use yet very powerful – enabling you to handle everything from regular mailshots to multi-stage shipping processes.

Ideal for large
shipping volumes

Efficient, automated
processing

Simple to import
& export data to
other systems

Supports multiple
users via LAN

Allows for multiple
step processes

Advanced tracking
& reporting capabilities

How your business gains

- Faster processing & increased productivity – via drop-down menus, hot keys, etc.
- Greater accuracy - with automated service updates and automatic validation of export shipments entries
- More visibility of shipments in transit and over shipping history
- Better control of shipping processes and costs
- Improved customer satisfaction – efficient, on-time and on-budget service.

All you need to ship

- A DHL Account Number
- A PC with a Pentium III and Internet connection or a modem
- Microsoft Windows 2000/NT/XP
- Works with laser printers for hard copy air waybills and customs documentation, thermal label printers and electronic weighing scales.

For more information or to schedule installation of DHL *EASYSHIP*, call your local DHL office or your DHL Sales Executive.
